

Coat Color and Trait Certificate

Call Name:	Edith	Laboratory #:	303922
Registered Name:	-	Registration #:	-
Breed:	French Bulldog	Certificate Date:	July 13, 2022
Sex:	Female		
DOB:	Dec. 2020		

This canine's DNA showed the following genotype(s):

Coat Color/Trait Test	Gene	Genotype	Interpretation
A Locus (Agouti)	<i>ASIP</i>	A^Y/A^Y	Sable/fawn
B Locus (Brown)	<i>TYRP1</i>	B/B	Black coat, nose and foot pads (does not carry brown)
Co Locus (Cocoa, French Bulldog Type)	<i>HPS3</i>	CO/co	Black coat, nose and foot pads (carries one copy of cocoa)
D Locus (Dilute)	<i>MLPH</i>	d/d	Dilute (carries two copies of dilute)
E Locus - E^m (Melanistic Mask)	<i>MC1R</i>	N/N	No melanistic mask
E Locus - e (Apricot/Cream/Red/Yellow, Common Variant Found in Many Breeds)	<i>MC1R</i>	E/e	Black (carries yellow/red)
I Locus (Intensity)	<i>MFS12</i>	i/i	Reduced intensity, likely light shades or white
K Locus (Dominant Black)	<i>CBD103</i>	k^Y/k^Y	Agouti expression allowed
L Locus (Long Hair/Fluffy) - Lh^1 (Common Variant Found in Many Breeds)	<i>FGF5</i>	Sh/Sh	Shorthaired (does not carry long hair)
L Locus (Long Hair/Fluffy) - Lh^4 (Afghan Hound, Eurasier, French Bulldog Type)	<i>FGF5</i>	Sh/Sh	Shorthaired (does not carry long hair)
M Locus (Merle)	<i>PMEL</i>	m/m	Non merle
S Locus (White Spotting, Parti, or Piebald)	<i>MITF</i>	S/s ^P	Limited white spotting, flash, parti, or piebald (carrier)

Interpretation:

This dog carries two copies of A^Y which results in a sable/fawn coat color. However, this dog's coat color is also dependent on the E, K, and B genes. The sable/fawn coat color is only expressed if the dog is also E/E or E/e at the E locus and k^Y/k^Y at the K locus which allows for agouti gene expression. This dog will pass on A^Y to 100% of its offspring.

This dog does not carry any copies of the b^a , b^c , b^d or b^s mutations and has a B locus genotype of **B/B**. Thus, this dog typically will have a black coat, nose, and foot pads. However, this dog's coat color is dependent on the genotypes of many other genes. This dog will pass one copy of **B** to 100% of its offspring and cannot produce b/b dogs.

Canine Genetic Health Certificate™

Call Name:	Edith	Laboratory #:	303922
Registered Name:	-	Registration #:	-
Breed:	French Bulldog	Certificate Date:	July 13, 2022
Sex:	Female		
DOB:	Dec. 2020		

This canine's DNA showed the following genotype(s):

Disease	Gene	Genotype	Interpretation
Cystinuria Type 3 (Bulldog Type Risk Factor) - Variant 2	SLC3A1	WT/WT	Normal (clear)
Cystinuria Type 3 (Bulldog Type Risk Factor) - Variant 3	SLC7A9	WT/WT	Normal (clear)
Degenerative Myelopathy	SOD1	WT/WT	Normal (clear)
Hereditary Cataracts	HSF4	WT/WT	Normal (clear)
Hyperuricosuria	SLC2A9	WT/WT	Normal (clear)
Multifocal Retinopathy 1	BEST1	WT/WT	Normal (clear)
Progressive Retinal Atrophy, Cone-Rod Dystrophy 4	RPGRIP1	WT/WT	Normal (clear)

WT, wild type (normal); M, mutant; Y, Y chromosome (male)

Paw Print Genetics® performed the testing on the dog listed on this certificate. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. The results included in this report relate only to the items tested using the sample provided. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the test(s) accuracy and precision with >99.9% sensitivity and specificity. The presence of mosaicism may not be detected by this test. Non-paternity may lead to unexpected results. This is not a breed identification test. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results. Genetic counseling is available at Paw Print Genetics.
